Subject Index of Volume 63

Activation
of carbon-supported Co–Mo catalysts in thiophene hydrodesulphurization, 31
highly dispersed Pd on MgO as catalyst for, of phenyl–chlorine bonds leading to C–C bond formation, L33
Adsorption
and reduction and reaction; Cu/silica catalysts, 255
Alcohols
efficient reduction of cyclohexanone to cyclohexanol and cyclohexane by *Halobacterium halobium* MMT_{22}, L15
FTIR-investigation of reaction of 2-propanol and acidity of vanadium oxides layered on zirconia and surface structure, 181
mechanism of CO and CO_2 hydrogenation reactions on zirconia-supported catalysts: diffuse reflectance FTIR study: surface species on Cu/zirconia catalysts: implications for methanol synthesis selectivity, 243
reactions of aliphatic alcohols on {011}-facetted TiO_2 (001) surface, 103
Aldehydes
hydroformylation of olefins catalysed by dichloro-bis(salicylaldehyde)-*o*-phenylenediiminatoruthenate(II), 137
hydroformylation of propylene to butyraldehyde using dichloro-bis(salicylaldehyde)-*o*-phenylenediiminato ruthenate(III), 1
hydrogenation of crotonaldehyde on Pt–Cd mixed metal colloid sols, L5
Michael addition promoted by bis-bidentate Ni(II) Schiff base complexes derived from aromatic 2-hydroxyaldehydes, 155
selective hydrogenation of α,β-unsaturated aldehydes in aqueous–organic two phase solvent systems using Ru complexes of sulphonated phosphines, L25
Alkali metal hydroxide pretreatment
effects of, on hydrogenation activity of Ni-loaded Y zeolites, 193
Alkanes
efficient reduction of cyclohexanone to cyclohexanol and cyclohexane by *Halobacterium halobium* MMT_{22}, L15
low- and high-temperature hydrogenative ring-opening of alkyl-substituted cyclopropanes and methyloxirane over Pd/SiO_2 catalysts: detection of β-hydride by chemical method, 43
short; carbonaceous residues in Rh/TiO_2-catalysed hydrogenolysis of, 353
Alkenes, Olefins
carbonylation of n-alkylallylamines with CO/H_2 mixtures, 335
catalytic dehalogenation of aryl and vinyl halides by tricyclopentadienyllanthanum, L1
catalytic hydrogenation of diene polymers: kinetic analysis and mechanistic studies on hydrogenation of polybutadiene polymers in presence of $RhCl(PPh_3)_3$, 279
dehydrocyclodimerization of conjugated dienes catalysed by solid bases, 371
homogeneous hydroformylation of, by *cis*-$[PtCl_2(PPh_3)_2]/SnCl_2$, 173
hydroformylation of, catalysed by dichloro-bis(salicylaldehyde)-*o*-phenylenediiminatoruthenate(II), 137
hydroformylation of propylene to butyraldehyde using dichloro-bis(salycilaldehyde)-*o*-phenylenediiminato ruthenate(III), 1
hydroformylation of *Z*-2-butene with $PtCl_2(cod)/SnCl_2/L$ catalytic system: effect of phosphorus ligand L, 15
influence of ligand nature in tetrakis(ligand)Ni(0) complex catalysts on course of propadiene–propyne co-oligomerization, 305
kinetics and mechanism of epoxidation of cyclohexene and cyclooctene with potassium hydrogen persulphate catalysed by aquoethylenediaminetetraacetatoruthenate(III) complex ion in water–dioxane medium, 147

Elsevier Sequoia/Printed in The Netherlands

kinetics and mechanism of oxidation of n-butenes over SnO_2–Sb_2O_4 catalysts, 361
Alkynes
influence of ligand nature in tetrakis(ligand)Ni(0) complex catalysts on course of propadiene–propyne co-oligomerization, 305
Aluminium
complexation of Cp_2MCl_2 in chloroaluminate molten salt: relevance to homogeneous Ziegler–Natta catalysis, 125
highly active alumina–supported molybdenum sulphide and related hydroprocessing catalysts derived from precipitation from homogeneous solution, L21
Amines
carbonylation of n-alkylallylamines with CO/H_2 mixtures, 335
Antimony
kinetics and mechanism of oxidation of n-butenes over SnO_2–Sb_2O_4 catalysts, 361
Aromatic compounds
activation of carbon-supported Co–Mo catalysts in thiophene hydrodesulphurization, 31
carbohydrate phosphinites as chiral ligands for asymmetric syntheses catalysed by complexes: immobilization of cationic Rh(I) chelates of phenyl 4,6,O-(*R*)-benzylidene-2,3-bis(O-diphenylphosphino)-β-D-glucopyranoside on silica, 319
catalytic dehalogenation of aryl and vinyl halides by tricyclopentadienyllanthanum, L1
catalytic hydrogenation of diene polymers: kinetic analysis and mechanistic studies on hydrogenation of polybutadiene polymers in presence of $RhCl(PPh_3)_3$, 279
highly dispersed Pd on MgO as catalyst for activation of phenyl−chlorine bonds leading to C−C bond formation, L33
homogeneous hydroformylation of olefins by *cis*-$[PtCl_2(PPh_3)_2]/SnCl_2$, 173
hydroformylation of olefins catalysed by dichloro-bis(salicylaldehyde)-*o*-phenylenediiminatoruthenate(II), 137
hydroformylation of propylene to butyraldehyde using dichloro-bis(salycilaldehyde)-*o*-phenylenediiminato ruthenate(III), 1
inversion of stereoselectivity in epoxidation of steroids by magnesium monoperoxyphthalate induced by manganese porphyrins, 167
Michael addition promoted by bis-bidentate Ni(II) Schiff base complexes derived from aromatic 2-hydroxyaldehydes, 155
Pd-catalysed double and monocarbonylation of phenyl iodide by methyl formate, 313
useful synthesis of benzotriazole photostabilizers by reductive carbonylation of *ortho*-nitrophenylazo compounds catlaysed by $Ru_3(CO)_{12}$ in presence of NEt_3, 299
visible light-induced hydrogen formation from water by various 1,1′-dialkyl-4,4′-bipyridinium salts (viologens), 271

Cadmium
hydrogenation of crotonaldehyde on Pt–Cd mixed metal colloid sols, L5
Carbohydrate phosphinites
as chiral ligands for asymmetric syntheses catalysed by complexes: immobilization of cationic Rh(I) chelates of phenyl 4,6,O-(*R*)-benzylidene-2,3-bis(O-diphenylphosphino)-β-D-glucopyranoside on silica, 319
Carbonaceous residues
in Rh/TiO_2-catalysed hydrogenolysis of short alkanes, 353
Carbonylation
of methyl acetate with homogeneous Ru complex catalyst, L29
of n-alkylallylamines with CO/H_2 mixtures, 335
Pd-catalysed double and mono-, of phenyl iodide by methyl formate, 313
reductive; useful synthesis of benzotriazole photostabilizers by, of *ortho*-nitrophenylazo compounds catalysed by $Ru_3(CO)_{12}$ in presence of NEt_3, 299
C−C bond formation
highly dispersed Pd on MgO as catalyst for activation of phenyl−chlorine bonds leading to, L33
Chloroaluminate molten salt
complexation of Cp_2MCl_2 in: relevance

to homogeneous Ziegler–Natta catalysis, 125
Chlorohydrins
phase-transfer catalysed transformation of, to epoxides, 131
CO
carbonylation of n-alkylallylamines with CO/H_2 mixtures, 335
hydrogenation on supported Rh–Mn catalysts, 201
mechanism of CO and CO_2 hydrogenation reactions on zirconia-supported catalysts: diffuse reflectance FTIR study:
identification of surface species and methanation reactions on Pd/zirconia catalysts, 223
surface species on Cu/zirconia catalysts: implications for methanol synthesis selectivity, 243
Cobalt
activation of carbon-supported Co–Mo catalysts in thiophene hydrodesulphurization, 31
Complexation
of Cp_2MCl_2 in chloroaluminate molten salt: relevance to homogeneous Ziegler–Natta catalysis, 125
Copper
effect of precursor on catalytic behaviour of Ru–Cu/MgO, 55
mechanism of CO and CO_2 hydrogenation reactions on zirconia-supported catalysts: diffuse reflectance FTIR study: surface species on Cu/zirconia catalysts: implications for methanol synthesis selectivity, 243
/silica catalysts: reduction, adsorption and reaction, 255
Crotonaldehyde
hydrogenation of, on Pt–Cd mixed metal colloid sols, L5
Cyclohexanone
efficient reduction of, to cyclohexanol and cyclohexane by *Halobacterium halobium* MMT_{22}, L15

Dehalogenation
catalytic, of aryl and vinyl halides by tricyclopentadienyllanthanum, L1
Dehydrocyclodimerization
of conjugated dienes catalysed by solid bases, 371
Dioxane
kinetics and mechanism of epoxidation of cyclohexene and cyclooctene with potassium hydrogen persulphate catalysed by aquoethylenediaminetetraacetatoruthenate(III) complex ion in water–dioxane medium, 147

Epoxidation
inversion of stereoselectivity in, of steroids by magnesium monoperoxyphthalate induced by manganese porphyrins, 167
kinetics and mechanism of, of cyclohexene and cyclooctene with potassium hydrogen persulphate catalysed by aquoethylenediaminetetraacetatoruthenate(III) complex ion in water–dioxane medium, 147
Epoxides
low- and high-temperature hydrogenative ring-opening of alkyl-substituted cyclopropanes and methyloxirane over Pd/SiO_2 catalyst: detection of β-hydride by chemical method, 43
phase-transfer catalysed transformation of chlorohydrins to, 131
Esters
carbonylation of methyl acetate with homogeneous Ru complex catalyst, L29
Pd-catalysed double and monocarbonylation of phenyl iodide by methyl formate, 313

Halides
aryl and vinyl; catalytic dehalogenation of, by tricyclopentadienyllanthanum, L1
Halobacterium halobium MMT_{22}
efficient reduction of cyclohexanone to cyclohexanol and cyclohexane by, L15
Heteropolyanions
Mo/W interchange of, as measure of stability: ^{31}P NMR study, 343
Hydroformylation
homogeneous, of olefins by *cis*-$[PtCl_2(PPh_3)_2]/SnCl_2$, 173
membrane-supported Rh, catalyst, 213
of olefins catalysed by dichloro-bis-(salicylaldehyde)-*o*-phenylenediiminatoruthenate(II), 137

of propylene to butyraldehyde using dichloro-bis(salicylaldehyde)-*o*-phenylenediiminato ruthenate(III), 1
of *Z*-2-butene with $PtCl_2$(cod)/$SnCl_2$/L catalytic system: effect of phosphorus ligand L, 15
Hydrogen
carbonylation of n-alkylallylamines with CO/H_2 mixtures, 335
electron-rich Ir complexes: metal-basicity-controlled chemoselectivity in hydrogen transfer reductions, 5
visible light-induced, formation from water by various 1,1′-dialkyl-4,4′-bipyridinium salts (viologens), 271
Hydrogenation
activity; effects of alkali metal hydroxide pretreatment on, of Ni-loaded Y zeolites, 193
catalytic, of diene polymers: kinetic analysis and mechanistic studies on hydrogenation of polybutadiene polymers in presence of $RhCl(PPh_3)_3$, 279
CO, on supported Rh–Mn catalysts, 201
of crotonaldehyde on Pt–Cd mixed metal colloid sols, L5
mechanism of CO and CO_2, reactions on zirconia-supported catalysts: diffuse reflectance FTIR study: identification of surface species and methanation reactions on Pd/zirconia catalysts, 223
surface species on Cu/zirconia catalysts: implications for methanol synthesis selectivity, 243
selective, of α,β-unsaturated aldehydes in aqueous–organic two phase solvent systems using Ru complexes of sulphonated phosphines, L25
Hydrogenolysis
Rh/TiO_2-catalysed; carbonaceous residues in, of short alkanes, 353
Hydroprocessing catalysts
highly active alumina-supported molybdenum sulphide and related, derived from precipitation from homogeneous solution, L21

Immobilization
of cationic Rh(I) chelates of phenyl 4,6,O-(*R*)-benzylidene-2,3-bis(O-diphenylphosphino)-β-D-glucopyranoside on silica; carbohydrate phosphinites as chiral ligands for asymmetric syntheses catalysed by complexes, 319
Irridium complexes
electron-rich: metal-basicity-controlled chemoselectivity in hydrogen transfer reductions, 5
Iron
Raman spectroscopy of iron molybdate catalyst systems: preparation of unsupported catalysts, 65
Isomorphous substitution
EPR evidence for, of Ti in silicalite structure, 95

Lanthanum
catalytic dehalogenation of aryl and vinyl halides by tricyclopentadienyllanthanum, L1

Magnesium
effect of precursor on catalytic behaviour of Ru–Cu/MgO, 55
highly dispersed Pd on MgO as catalyst for activation of phenyl–chlorine bonds leading to C–C bond formation, L33
inversion of stereoselectivity in epoxidation of steroids by magnesium monoperoxyphthalate induced by manganese porphyrins, 167
Manganese
CO hydrogenation on supported Rh–Mn catalysts, 201
porphyrins; inversion of stereoselectivity in epoxidation of steroids by magnesium monoperoxyphthalate induced by, 167
Membrane
-supported Rh hydroformylation catalyst, 213
Metal oxide vapour synthesis
of heterogeneous catalysts, L11
Methanation
mechanism of CO and CO_2 hydrogenation reactions on zirconia-supported catalysts: diffuse reflectance FTIR study; identification of surface species and methanation reactions on Pd/zirconia catalysts, 223
Methyloxirane
low- and high-temperature hydrogenative ring-opening of alkyl-substituted cyclopropanes and methyloxirane

over Pd/SiO_2 catalyst: detection of β-hydride by chemical method, 43
Michael addition
promoted by bis-bidentate Ni(II) Schiff base complexes derived from aromatic 2-hydroxyaldehydes, 155
Molybdenum
activation of carbon-supported Co–Mo catalysts in thiophene hydrodesulphurization, 31
highly active alumina-supported molybdenum sulphide and related hydroprocessing catalysts derived from precipitation from homogeneous solution, L21
Raman spectroscopy of iron molybdate catalyst systems: preparation of unsupported catalysts, 65
/W interchange of heteropolyanions as measure of stability: ^{31}P NMR study, 343

Nickel
effects of alkali metal hydroxide pretreatment on hydrogenation activity of Ni-loaded Y zeolites, 193
influence of ligand nature in tetrakis(ligand)(Ni(0) complex catalysts on course of propadiene–propyne co-oligomerization, 305
Michael addition promoted by bis-bidentate Ni(II) Schiff base complexes derived from aromatic 2-hydroxyaldehydes, 155

Olefins: see Alkenes
Oligomerization
dehydrocyclodimerization of conjugated dienes catalysed by solid bases, 371
propadiene–propyne co-; influence of ligand nature in tetrakis(ligand)-Ni(0)complex catalysts on course of, 305
Oxidation
kinetics and mechanism of, of n-butenes over SnO_2–Sb_2O_4 catalysts, 36

Palladium
-catalysed double and monocarbonylation of phenyl iodide by methyl formate, 313
highly dispersed Pd on MgO as catalyst for activation of phenyl−chlorine bonds leading to C−C bond formation, L33
low- and high-temperature hydrogenative ring-opening of alkyl-substituted cyclopropanes and methyloxirane over Pd/SiO_2 catalyst: detection of β-hydride by chemical emthod, 43
mechanism of CO and CO_2 hydrogenation reactions on zirconia-supported catalysts: diffuse reflectance FTIR study: identification of surface species and methanation reactions on Pd/zirconia catalysts, 223
Phosphorus
carbohydrate phosphinites as chiral ligands for asymmetric syntheses catalysed by complexes: immobilization of cationic Rh(I) chelates of phenyl 4,6,O-(*R*)-benzylidene-2,3-bis(O-diphenylphosphino)-β-D-glucopyranoside on silica, 319
homogeneous hydroformylation of olefins by *cis*-$[PtCl_2(PPh_3)_2]/SnCl_2$, 173
hydroformylation of *Z*-2-butene with $PtCl_2$(cod)/$SnCl_2$/L catalytic system: effect of phosphorus ligand L, 15
Mo/W interchange of heteropolyanions as measure of stability: ^{31}P NMR study, 343
selective hydrogenation of α,β-unsaturated aldehydes in aqueous–organic two phase solvent systems using Ru complexes of sulphonated phosphines, L25
Photostabilizers
useful synthesis of benzotriazole, by reductive carbonylation of *ortho*-nitrophenylazo compounds catalysed by $Ru_3(CO)_{12}$ in presence of NEt_3, 299
Platinum
homogeneous hydroformylation of olefins by *cis*-$[PtCl_2(PPh_3)_2]/SnCl_2$, 173
hydroformylation of *Z*-2-butene with $PtCl_2$(cod)/$SnCl_2$/L catalytic system: effect of phosphorus ligand L, 15
hydrogenation of crotonaldehyde on Pt–Cd mixed metal colloid sols, L5
Polymers
catalytic hydrogenation of diene polymers: kinetic analysis and mechanistic studies on hydrogenation of polybutadiene polymers in presence of $RhCl(PPh_3)_3$, 279
Potassium
kinetics and mechanism of epoxidation of cyclohexene and cyclooctene with

potassium hydrogen persulphate catalysed by aquoethylenediaminetetraacetatoruthenate(III) complex ion in water–dioxane medium, 147

Reduction
and adsorption and reaction; Cu/silica catalysts, 255
efficient, of cyclohexanone to cyclohexanol and cyclohexane by *Halobacterium halobium* MMT_{22}, L15
electron-rich Ir complexes: metal-basicity-controlled chemoselectivity in hydrogen transfer reductions, 5

Rhodium
carbohydrate phosphinites as chiral ligands for asymmetric syntheses catalysed by complexes: immobilization of cationic Rh(I) chelates of phenyl 4,6,O-(*R*)-benzylidene-2,3-bis(O-diphenylphosphino)-β-D-glucopyranoside on silica, 319
carbonaceous residues in Rh/TiO_2-catalysed hydrogenolysis of short alkanes, 353
catalytic hydrogenation of diene polymers: kinetic analysis and mechanistic studies on hydrogenation of polybutadiene polymers in presence of $RhCl(PPh_3)_3$, 279
CO hydrogenation on supported Rh–Mn catalysts, 201
membrane-supported Rh hydroformylation catalyst, 213

Ring-opening
low- and high-temperature hydrogenative, of alkyl-substituted cyclopropanes and methyloxirane over Pd/SiO_2 catalyst: detection of β-hydride by chemical method, 43

Ruthenium
carbonylation of methyl acetate with homogeneous Ru complex catalyst, L29
effect of precursor on catalytic behaviour of Ru–Cu/MgO, 55
hydroformylation of olefins catalysed by dichloro-bis(salicylaldehyde)-*o*-phenylenediiminatoruthenate(II), 137
hydroformylation of propylene to butyraldehyde using dichloro-bis(salicylaldehyde)-*o*-phenylenediiminato ruthenate(III), 1
kinetics and mechanism of epoxidation of cyclohexene and cyclooctene with potassium hydrogen persulphate catalysed by aquoethylenediaminetetraacetatoruthenate(III) complex ion in water–dioxane medium, 147
selective hydrogenation of α,β-unsaturated aldehydes in aqueous–organic two phase solvent systems using Ru complexes of sulphonated phosphines, L25
useful synthesis of benzotriazole photostabilizers by reductive carbonylation of *ortho*-nitrophenylazo compounds catalysed by $Ru_3(CO)_{12}$ in presence of NEt_3, 299

Schiff base complexes
bis-bidentate Ni(II), derived from aromatic 2-hydroxyaldehydes; Michael addition promoted by, 155

Silicon
carbohydrate phosphinites as chiral ligands for asymmetric syntheses catalysed by complexes: immobilization of cationic Rh(I) chelates of phenyl 4,6,O-(*R*)-benzylidene-2,3-bis(O-diphenylphosphino)-β-D-glucopyranoside on silica, 319
Cu/silica catalysts: reduction, adsorption and reaction, 255
EPR evidence for isomorphous substitution of Ti in silicalite structure, 95
low- and high-temperature hydrogenative ring-opening of alkyl-substituted cyclopropanes and methyloxirane over Pd/SiO_2 catalyst: detection of β-hydride by chemical method, 43

Sols
Pt–Cd mixed metal colloid; hydrogenation of crotonaldehyde on, L5

Spectroscopy
diffuse reflectance FTIR study: mechanism of CO and CO_2 hydrogenation reactions on zirconia-supported catalysts:
identification of surface species and methanation reactions on Pd/zirconia catalysts, 223
surface species on Cu/zirconia catalysts: implications for methanol synthesis selectivity, 243
EPR evidence for isomorphous substitution of Ti in silicalite structure, 95
FTIR-investigation of reaction of 2-propanol and acidity of vanadium oxides layered on zirconia and surface structure, 181

Mo/W interchange of heteropolyanions as measure of stability: ^{31}P NMR study, 343
Raman, of iron molybdate catalyst systems: preparation of unsupported catalysts, 65
Steroids
inversion of stereoselectivity in epoxidation of, by magnesium monoperoxyphthalate induced by manganese porphyrins, 167
Sulphur
activation of carbon-supported Co–Mo catalysts in thiophene hydrodesulphurization, 31
highly active alumina-supported molybdenum sulphide and related hydroprocessing catalysts derived from precipitation from homogeneous solution, L21
kinetics and mechanism of epoxidation of cyclohexene and cyclooctene with potassium hydrogen persulphate catalysed by aquoethylenediaminetetraacetatoruthenate(III) complex ion in water–dioxane medium, 147
selective hydrogenation of α,β-unsaturated aldehydes in aqueous–organic two phase solvent systems using Ru complexes of sulphonated phosphines, L25
Surface
FTIR-investigation of reaction of 2-propanol and acidity of vanadium oxides layered on zirconia and surface structure, 181
identification of surface species and methanation reactions on Pd/zirconia catalysts: mechanism of CO and CO_2 hydrogenation reactions on zirconia-supported catalysts: diffuse reflectance FTIR study, 223
reactions of aliphatic alcohols on {011}-facetted TiO_2 (001) surface, 103
surface species on Cu/zirconia catalysts: implications for methanol synthesis selectivity: mechanism of CO and CO_2 hydrogenation reactions on zirconia-supported catalysts: diffuse reflectance FTIR study, 243

Tin
homogeneous hydroformylation of olefins by *cis*-$[PtCl_2(PPh_3)_2]/SnCl_2$, 173
hydroformylation of *Z*-2-butene with $PtCl_2$(cod)/$SnCl_2$/L catalytic system: effect of phosphorus ligand L, 15
kinetics and mechanism of oxidation of n-butenes over SnO_2–Sb_2O_4 catalysts, 361
Titanium
carbonaceous residues in Rh/TiO_2-catalysed hydrogenolysis of short alkanes, 353
EPR evidence for isomorphous substitution of, in silicalite structure, 95
reactions of aliphatic alcohols on {011}-facetted TiO_2 (001) surface, 103
Tungsten
/Mo interchange of heteropolyanions as measure of stability: ^{31}P NMR study, 343

Vanadium
FTIR-investigation of reaction of 2-propanol and acidity of vanadium oxides layered on zirconia and surface structure, 181
Vinyl halides
catalytic dehalogenation of aryl and vinyl halides by tricyclopentadienyllanthanum, L1
Viologens
visible light-induced hydrogen formation from water by various 1,1′-dialkyl-4,4′-bipyridinium salts, 271
Visible light
-induced hydrogen formation from water by various 1,1′-dialkyl-4,4′-bipyridinium salts (viologens), 271

Water
kinetics and mechanism of epoxidation of cyclohexene and cyclooctene with potassium hydrogen persulphate catalysed by aquoethylenediaminetetraacetatoruthenate(III) complex ion in water–dioxane medium, 147
visible light-induced hydrogen formation from, by various 1,1′-dialkyl-4,4′-bipyridinium salts (viologens), 271

Zeolites
Ni-loaded Y: effects of alkali metal hydroxide pretreatment on hydrogenation activity of, 193

Ziegler–Natta catalysis
homogeneous, relevance to: complexation of Cp_2MCl_2 in chloroaluminate molten salt, 125
Zirconium
FTIR-investigation of reaction of 2-propanol and acidity of vanadium oxides layered on zirconia and surface structure, 181
mechanism of CO and CO_2 hydrogenation reactions on zirconia-supported catalysts: diffuse reflectance FTIR study:
identification of surface species and methanation reactions on Pd/zirconia catalysts, 223
surface species on Cu/zirconia catalysts: implications for methanol synthesis selectivity, 243
